DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a board-band deep-ultraviolet achromatic catadioptric imaging system, classified in class 359, subclass 351.
 - II. Claims 11-14, drawn to a catadioptric imaging system having a plurality of lens elements, classified in class 359, subclass 727.
 - III. Claims 15-20, drawn to a method of inspecting objects for defects using ultraviolet radiation, classified in class 250, subclass 461.1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions III and (I, II) are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another and materially different apparatus such as an apparatus that does not require focusing, field and catadioptric relay groups as set forth in the group I or an apparatus that does not require the specific lens elements as set forth in the group II.
3. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions in tat invention of the

group I provide ultraviolet imaging and the invention of the group II provide imaging that is not limited to ultraviolet. The different inventions also have different modes of operations in that the invention of the group I utilizes a focusing lens group, a field lens group and a catadioptric lens group while the invention of the group II does not require these specific lens groups.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for any one group is not required for any other group, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Kevin McAndrews on 04/23/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
